

Azure Data Factory: ZERO TO HERO

Paul Andrew
@MrPaulAndrew

Simon Whiteley
@MrSiWhiteley

Agenda

- **Module 1** - What and why Azure Data Factory?
- **Lab 1** - Creating a simple copy pipeline.
- **Module 2** - Dynamic pipelines and advanced patterns.
- **Lab 2** - Copying all tables from a SQLDB using metadata driven parameters.
- **Module 3** - Data Factory Extensibility
- **Module 4** - Data Factory Data Flows
- **Lab 3** - Using data flows to transform and load your data.
- **Module 5** - Lift and shift your SSIS packages to Azure
- **Module 6** - Data Factory in Production
- **Module 7** – Conclusions, Questions, Wrap Up

What do you want to get out of today?
